PROFESSIONAL PROFILE

Final-semester Technical Computer Science student at Wroclaw University of Science and Technology, specializing in Information Systems in Medicine, and a qualified IT technician. I develop web and desktop applications with C#/.NET and relational databases. My KODA.AI internship provided experience in conversational AI platforms, model evaluation, testing and workflow automation. I am available full-time for a junior C#/.NET developer role.

TECHNICAL SKILLS

Application development C#/.NET, ASP.NET Core, Avalonia UI, React, TypeScript, Next.js, Django, Java, Python	**Databases and backend** PostgreSQL, MySQL, SQLite, SQL, Entity Framework Core, ODBC, MediatR, REST APIs
Testing and delivery Playwright, xUnit, Testcontainers, GitHub Actions, Docker Compose, Git/GitHub, documentation	**Systems and automation** Windows, Linux, TCP/IP, DNS, DHCP, diagnostics, n8n, Jira, Slack, API integrations

SELECTED PROJECTS

Order Flow Management System

GitHub

Personal project - ASP.NET Core 8, C#, PostgreSQL, EF Core, MediatR, Docker

- Order and inventory system covering simulated payments, warehouse fulfilment, role-based access and a bilingual web interface.
- Layered backend with controlled order transitions, transactional stock reservations, optimistic concurrency and an Outbox worker for background event processing.
- 45 automated tests covering domain rules, PostgreSQL/API integration and frontend behaviour; includes concurrent stock-reservation checks, Docker Compose and GitHub Actions.

Helpdesk Management System

GitHub

Personal project - ASP.NET Core, React, TypeScript, PostgreSQL, Docker

- Internal IT support application with ticket queues, Employee/Technician/Admin roles, public and internal comments, SLA tracking, audit history, asset inventory and CSV/PDF reports.
- Layered ASP.NET Core API with JWT authentication, EF Core migrations and seed data, connected to a bilingual React/TypeScript interface.
- Unit, API/integration and Playwright end-to-end tests, Docker Compose setup, GitHub Actions and architecture/QA documentation.

Pharmacy Management System

GitHub

Team project - C#/.NET, Avalonia UI, PostgreSQL, ODBC, MVVM

- Cross-platform desktop application for medicines, customers, prescriptions, sales, deliveries, inventory, reports, backups and user roles.
- Contributed to the UI and database; the project uses Avalonia/MVVM, ODBC repositories, data validation, PostgreSQL migrations, constraints, views and triggers.
- Portfolio case study with screenshots, a setup guide, macOS/Windows scripts, a SQL smoke test and project documentation.

I consent to the processing of my personal data included in this CV for the purposes of the current recruitment process.

Robert Tworek C#/.NET - application development - databases - testing

PROFESSIONAL EXPERIENCE

KODA.AI - Generative Prompt Engineer Intern

September–October 2026 - 160-hour internship

- Worked daily on the KODA conversational AI platform: configured intents and training phrases for user requests, updated prompts and knowledge bases, and tested chatbot and voicebot conversation flows against client scenarios.
- Built, tested and documented n8n workflows and API integrations automating business processes, covering workflow logic and implementation requirements.
- Designed a voicebot conversation analyzer (R&D task): a mechanism that analyzes client voicebot conversations, detects gaps such as unrecognized requests, missing intents or knowledge-base answers, and turns them into input for retraining the bots.
- Ran comparative analyses of language models, assessing response quality, consistency and fit for client use cases, and prepared findings and QA documentation.

St. Luke's Hospital, Boleslawiec - IT Support Intern

May 2021 - 160-hour internship

- Vocational internship for the IT technician qualification: set up PCs and diagnosed hardware and peripherals as part of the hospital IT team's day-to-day work.

ADDITIONAL PROJECTS

Bilingual Portfolio Website

Personal project - Next.js, React, TypeScript, Tailwind CSS, GitHub REST API, Vercel

- Bilingual portfolio with /pl and /en routes, project case studies, CV downloads, a contact section and a consistent violet visual identity.
- GitHub REST API integration, localized TypeScript content, SEO metadata, sitemap, robots.txt, an OpenGraph endpoint and Vercel deployment.

TSP Algorithms Benchmark

Academic project - C++17/20, Python, TSPLIB, CSV, Makefile

- TSP/ATSP benchmark covering brute force, heuristics, Branch and Bound, Simulated Annealing and a Genetic Algorithm with local improvement.
- Compares runtime, tour length, relative error and search statistics; includes CSV outputs, plots, reproducible configurations and testing documentation.

Vocabulary Learning App

Team project - Python, Django, DRF, SQLite, HTML/CSS/JavaScript

- Web application with public/private vocabulary sets, CSV/JSON imports, flashcards, typed-answer practice, quizzes and progress statistics.
- Main contribution: frontend/UI, Django templates, responsive dashboard, CSS, JavaScript and connecting user flows to API endpoints.

TRAINING AND CERTIFICATES

September 2026 — **Securitum - AI for admins: an AI agent as a controlled helpdesk bot (n8n, Confluence, firewall and proxy)**
1.5-hour training, certificate of participation. Topics: system prompts are not a security control, identity and tokens (LiteLLM), restricting agent internet access, agent sandboxing.

EDUCATION

2022 - present — **Wroclaw University of Science and Technology**
Technical Computer Science - engineering studies. Expected graduation: February 2027.
Specialization: Information Systems in Medicine.
Engineering thesis (in progress): audio signal and music analyzer.

2018 - 2022 — **Electronic Schools Complex in Boleslawiec**
IT technician (EE.08, EE.09) - computer systems, networks, websites and databases.

LANGUAGES, STRENGTHS AND TARGET ROLE

Languages	Polish - native | English - B2; reading technical documentation
Strengths	Structured problem-solving, quality-focused testing, technical communication, teamwork, learning new tools quickly.
Target	Junior C#/.NET developer - backend, web or desktop application development.

I consent to the processing of my personal data included in this CV for the purposes of the current recruitment process.
