TECHNOLOGIES

SYSTEMS & SUPPORT
Windows, Linux, hardware and software diagnostics, log analysis

NETWORKING
TCP/IP, DNS, DHCP, VLAN

DATABASES
SQL, PostgreSQL, MySQL

PROGRAMMING
C#/.NET, Java, Python, C++, VHDL

WEB & APPLICATIONS
HTML, CSS, JavaScript, TypeScript, ASP.NET, React, Django

TOOLS
Git, GitHub, Docker, Word, Excel

LANGUAGES

PL Polish - native

EN English - B2

STRENGTHS

- Analytical problem solving
- Independent IT diagnostics
- Accuracy in testing and documentation
- Communication and teamwork

PROFESSIONAL PROFILE

Technical Computer Science student at Wrocław University of Science and Technology, specializing in Information Systems in Medicine, with an IT technician qualification. In academic projects I worked on web and desktop applications, relational databases, TCP communication, testing, log analysis and technical documentation. I combine programming fundamentals with a practical approach to diagnostics and system maintenance, and I am comfortable in tasks related to development, IT support and solution quality.

PROJECTS AND TECHNICAL EXPERIENCE

1. **Pharmacy Management System - team project**
   C#, Avalonia UI, PostgreSQL, ODBC
   Desktop application for pharmacy operations: medicines, customers, prescriptions, sales, deliveries and reports. Scope: PostgreSQL relational model, user roles, data validation, audit trail and reporting views.

2. **Cinema Reservation and Operations System - team project**
   C#/.NET, ASP.NET, React, TypeScript, PostgreSQL, Docker
   Full-stack application with an ASP.NET backend, React/TypeScript frontend and PostgreSQL database. Scope: movie schedule, film search, seat reservation, ticket sales, administration panel and Docker.

3. **Multiprocess Restaurant Simulation**
   Java, Swing, TCP sockets
   Client-server simulation with separate processes for the client, server, GUI and restocker. Scope: TCP communication, resource access synchronization and live visualization of system state.

4. **1-Wire Driver for DS18S20 Sensor - team project**
   VHDL, Vivado, XSim, FPGA
   Driver for reading temperature from a DS18S20 sensor on an AUP-ZU3 board. Scope: bit and byte layers, testbenches, timing simulations and implementation report.

5. **Optimization Algorithms for TSP and ATSP**
   C++17, Python, TSPLIB, CSV
   Comparison of exact algorithms, heuristics and metaheuristics for TSP/ATSP. Scope: automated tests, time and error measurements, CSV result export and comparative analysis.

6. **Vocabulary Learning Application - team project**
   Python, Django, HTML, CSS, JavaScript
   Web application with flashcards, quizzes and progress tracking. Scope: interface views, styling and basic user interactions.

EDUCATION AND INTERNSHIPS

Wrocław University of Science and Technology 2022 - present
Technical Computer Science - engineering degree program
Faculty of Information and Communication Technology | specialization: IMT - Information Systems in Medicine

Electronic Technical School Complex in Bolesławiec 2018 - 2022
IT Technician
Qualifications: operation of computer systems, peripheral devices and networks; development of websites and databases. Professional internship: St. Luke's Hospital in Bolesławiec.

ADDITIONAL INFORMATION

- Open to technical tasks: application development, system maintenance, IT support and working with data.
- Wrocław / Nowogrodziec; on-site, hybrid or remote work - depending on the offer.

I hereby consent to the processing of my personal data included in this CV for the purposes of the current recruitment process in accordance with applicable law.
